I really appreciated the understanding he has of the interconnection of the muscles, tendons, tissues, etc. I felt he was really helping resolve the problems I am having since the accident I suffered almost a year ago.

Looking forward to my second appointment to relieve SI problems that have not been relieved with chiropractic.

Only negative is the flight of stairs needed to reach the center and the musty smell in the stairwell.

I really like Mr.Duval, he was very kind and a good listener. The only thing I didn't like was his room that he did his massage was also his office and you could hear the people coming in and out of the adjoining office ,also he should have the soothing music that you hear in the waiting area in the actual massage area.

While I am very proactive about getting myself back to 100%, the going was very slow because I have no medical/physical training. Mark Duval not only pin pointed significant issues and relived them, but took more time to accomplish this than was required. He is first rate at diagnosis, and treatment of pain/restraint issues.

Never had a massage where the room was bright and there was no relaxing music playing. It was different but I walked away feeling great!
